

2017 MCCC Iowa report

Compiled by Andy Lensen, Department of Agronomy, Iowa State University, Ames, IA 50011-1010

Summary of cover crop activities in Iowa for 2017

Estimates for the total acreage of cover crops planted in Iowa in fall of 2017 were 760,000 acres. The Iowa Department of Agriculture and Land Stewardship cost-shared 177,000 acres, USDA-NRCS EQIP contracted 27,864 acres, USDA-NRCS CSP supported additional acres contracted that included cover crop enhancements, and the ADM/Unilever Sustainable Soy Continuous Improvement program supported 39,000 cover crop acres in 2017. Outreach efforts on cover crop in Iowa reached over 10,000 individuals through nearly 200 activities, including on-farm meetings, Iowa State University Extension articles, Iowa Learning Farms and Practical Farmers of Iowa outreach activities. Other cover crop outputs included publication of 13 refereed scientific articles and two PhD dissertations. For 2017, there were nine graduate students, three post-doctoral research associates, and one research associate conducting research on cover crops with support from 10 funded grant proposals.

Grant Funding obtained in Iowa with cover crop research or outreach activities (14):

Berti, M., B. Johnson, D. Ripplinger, H. Kandel, A. Wick, A. Akyuz, J. Ransom, D. Franzen, R. Gesch, F. Forcella, A. Lenssen, K. Moore, S. Wells. 2015-2019. USDA AFRI Food Security CAP, Agricultural Production Systems – Cropping Systems. A5160. A novel management approach to increase productivity, resilience, and long-term sustainability in cropping systems in the northern Great Plains.

2. On-farm research projects

- In 2017, PFI worked with 23 PFI farmers who conducted 32 on-farm research trials related to cover crops.
- Particularly noteworthy were two trials in 2017 that confirmed findings from 2016 and 2015: Delaying cereal rye cover crop termination until within 1-3 days of soybean planting can reduce weed pressure and costs.
- Three trials in 2017 confirmed findings from 2016 as well as anecdotal evidence: Delaying cereal rye cover crop termination until within 1-3 days of corn planting had an adverse effect on corn yield. This has led us to recommend to farmers that a cereal rye cover crop should be terminated 10-14 days before planting corn. Trials that will investigate the application of N fertilizer with the corn planter, as well as sampling for corn seedling pathogens, are the follow ups to the trials in 2016 and 2017.
- We concluded five years of cover crop species testing. Cereal rye and other small grains species tended to be the best performers in our 2016-17 cover crop variety trial that also included brassica and legume species.

3. Outreach

Field Days/Workshops/Conferences/Meetings

54 PFI farmer members and staff organized and held **99 cover crop field days, workshops, conference sessions, webinars, meetings, and presentations** at different locations around Iowa with a total number of **6980** people attending or watching.

Event Date	Event Description	Location	# of Attendees
1/10/17	Crop Advantage Series	Storm Lake	30
1/19/17	Conserving \$\$ and Soil	Ames, IA	35
1/20/17	A Decade of Cover Crops Research	Ames, IA	100
1/20/17	Insects and Soil Health with Jonathan Lundgren	Ames, IA	118
1/21/17	Cover Crops 201	Ames, IA	85
1/21/17	Cover Crops and Conservation on Rented Ground	Ames, IA	45

4. Three Experiences with Roller-Crimping Cover Crops.” Farminar. November 28, 2017. 37 participants. 60 archived views. <http://www.practicalfarmers.org/farmer-knowledge/farminar-archive/three-experiences-roller-crimping-cover-crops/>
5. “Integrating Livestock and Cover Crops for Profit in Nebraska.” Farminar. December 19, 2017. 19 participants. 20 archived views. <http://www.practicalfarmers.org/farmer-knowledge/farminar-archive/integrating-livestock-cover-crops-profit-nebraska/>
6. “Integrating Livestock and Cover Crops for profit in Kansas.” Farminar. December 13, 2017. 24 participants. 35 archived views <http://www.practicalfarmers.org/farmer-knowledge/farminar-archive/integrating-livestock-cover-crops-profit-kansas/>

Organic cover crop-related Extension and Outreach activities

Presentations on Cover Crop Research:

Date	Location	Title	Audience Number
January 17	Hort 424 Class, Dept. of Horticulture, Iowa State University, Ames, IA	Organic Agriculture	32
February 17	Horticulture In-Service Training	Extension Organic Horticulture Update	20
February 24	MOSES Organic Conference, La Crosse, WI	Organic No-Till for Field Crops	75
March 2	USDA Listening Session on Future of Agriculture, Washington, D.C.	Innovations in Organic Agriculture	105
March 15	Horticulture Dept., University of Florida, Gainesville, FL	Organic Livestock Production and Regulations	22
March 23	Agronomy Dept., Purdue University, West Lafayette,	Organic Agriculture Program	64
March 30	Brenton Center, ISU	Leopold Center Projects (video)	
April 20	Rodale Institute, Kutztown, PA	Food Safety Considerations in Integrated Crop-Livestock Systems	10
May 17	National Press Corps Annual Conference, Des Moines, IA	Soil and Water Quality in Organic vs. Conventional Systems	84
August 22	Neely-Kinyon Field Day, Greenfield, IA	Overview of Organic Experiments: LTAR, Organic No-Till and	45

		Integrated Crop-Livestock	
August 31	Organic Field Day, University of Wisconsin, Madison, WI	Soil Quality in Organic Farming	106
September 7	SERF Field Day, Crawfordsville, IA	Organic No-Till Soybean and Barley Research	40
September 9	Rodale Institute, Kutztown, PA	Organic Pioneer Award Presentation	225
September 19	ASHS Annual Conference, Waikoloa, HI	Improving Soil Conservation and Crop Performance through Reduced Tillage and Cover Crop-based Rotations in Organic Squash Production	82
October 25	American Society of Agronomy Annual Conference, Tampa, FL	Effect of Field History and Tillage on Crop Productivity and Soil Quality in Organic No-till Soybean Systems	74
November 20	Iowa Organic Conference, Iowa City, IA	Integrating Crops and Livestock	56
November 28	Hort 530 Class, Dept. of Horticulture, Iowa State University, Ames, IA	Agroecological Research	4

Total: 16 presentations

Audience: 1,044 participants

Field Days:

Date	Location	Title	Audience Number
August 22	Neely-Kinyon Field Day, Greenfield, IA	Overview of Organic Experiments: LTAR, Organic No-Till and Integrated Crop-Livestock	45
August 31	Organic Field Day, University of Wisconsin, Madison, WI	Soil Quality in Organic Farming	106
September 7	SERF Field Day, Crawfordsville, IA	Organic No-Till Soybean and Barley Research	40

Conferences:

February 24	MOSES Organic Conference, La Crosse, WI	Organic No-Till for Field Crops	75
May 17	National Press Corps Annual Conference, Des Moines, IA	Soil and Water Quality in Organic vs. Conventional Systems	84
September 19	ASHS Annual Conference, Waikoloa, HI	Improving Soil Conservation and Crop Performance through Reduced Tillage and Cover	82

		Crop-based Rotations in Organic Squash Production	
October 25	American Society of Agronomy Annual Conference, Tampa, FL	Effect of Field History and Tillage on Crop Productivity and Soil Quality in Organic No-till Soybean Systems	74
November 20	Iowa Organic Conference, Iowa City, IA	Integrating Crops and Livestock	56
